

Integration Engineer / Infrastructure Architect - Information Technology

Bank of Cyprus is looking to recruit an Integration Engineer / Infrastructure Architect - Information Technology, for the Nicosia Region offices of the Operations Division.

PURPOSE

The successful candidate will be expected to define, deliver and maintain the Infrastructure Technology Architecture strategy and associated standards that must be aligned with the overall IT Strategic and Business objectives of the organization. He / She will also plan the execution of a project, prioritize tasks, prepare resources and assist in resource assignment.

RESPONSIBILITIES & MAIN ACTIVITIES

- Define the required short term and long term infrastructure architecture.
- Define infrastructure architecture standards to support the overall strategic architecture framework.
- Review and update the defined infrastructure architecture and standards on a periodic basis to keep up with technological advances.
- Evaluate architectural alternatives, determine the applicability of the technology and define the best possible architecture using that particular technology.
- Define integration support services to ensure a standardised integration architecture and methods for internal and external systems.
- Consider technology trends and innovation initiatives to define the long term view of the IT architecture and to incorporate principles that support the business objectives and strategies.
- Participate in any IT related process to verify the compliance for a design or an implementation to the infrastructure architecture standards.
- Be the recipient of projects and tasks within infrastructure, and participate in the demand management process in order to ensure that requests are aligned with infrastructure architecture.
- Interact with the required control functions (e.g. Information Security, Risk, Audit, Compliance) to obtain input when and if required regarding infrastructure architecture standards.
- Prepare project execution planning, prepare resources in advance and assist in the assignment of people to projects/tasks taking into account budgets, costs, resource availability and deadlines.
- Understand the major aims of each project to be executed and the complex relationship between projects and resources, have a global overview of the resources to be allocated and prioritize tasks effectively.

COMPETENCIES

- Results orientation / Accountability
- Analysis & Problem Solving
- Resilience / Adaptability
- Customer Service Orientation
- Communication / Interpersonal Skills
- Team Work

EXPERIENCE / KNOWLEDGE

- Knowledge of IT and Information Security regulatory requirements for the Banking industry.
- Knowledge of IT infrastructure architectures, technology and service oriented practices.
- Significant knowledge of technologies and trends and deep interest in keeping up to date with technological developments.
- Expertise in developing technical standards and policies.
- Previous working experience in Information Technology, preferably in the Banking industry, will be considered an advantage.

REQUIRED QUALIFICATIONS

- Bachelor's or Master's Degree in an Information Technology related subject.

ADDITIONAL QUALIFICATIONS

- Certification in project management will be considered an advantage.

REMUNERATION

Successful candidates will be offered an attractive remuneration package depending on qualifications and experience.
